The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/669,367	<b>Applicant(s)</b> HOSODA ET AL.	
	<b>Examiner</b> Karen C. Tang	<b>Art Unit</b> 2151	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 28 June 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

#### ***Response to Arguments***

Applicant's arguments with respect to claim 10 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 10 is rejected under 35 U.S.C. 102(e) as being anticipated by De Beer (US 2007/0129078).

1. Referring to Claims 10, De Beer disclosed a wireless LAN driver (wireless phone has processors, refer to 0046), and a wireless LAN hardware module (wireless apparatus provides network communication, therefore it has the LAN hardware module to established the communication, local network, 0036). Wherein said driver and hardware module are arranged to (a) obtain a time zone within which the system is located from a date and time property of an operating system (OS) of the system in response to a country update request from a user of the system (when the mobile provides the list of countries

and code and mobile network code, there must be a time zone and date and time property associated with it as well.), (b) retrieve a list of countries in the time zone within which the system is located (refer to 0056), (c) permit the user of the system to select a present-location country from the list of countries retrieved (refer to 0148), (d) retrieve communication channel and transmission power settings for the present-location country from a table (by selecting a country, the network/communication channel is associated with the country will also be selected, refer to 0148, and the power setting must have been retrieved it in order for the communication to be established), (e) set the communication channel and the transmission power in the system based on the retrieved settings to enable communication in the present-location country (by selecting a country, the network/communication channel is associated with the country will also be selected, refer to 0148, and the power setting must have been retrieved it in order for the communication to be established.).

### **Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over De Beer (US 2007/0129078) in view of Motomura (EP 1209863).

Referring to Claim 11, Although De Beer disclosed the invention substantially as claimed, De Beer is silent regarding wherein the system whether the present-location country employs frequency hopping (FH) or DS-SS.

Motomura, in an analogous art disclosed wherein the retrieved settings define whether the system employs frequency hopping (FH) or DS-SS (refer to Fig 6A, 6B, and 6C)

Hence, providing feature disclosed by Motomura, would be desired for a user to implements wireless data communication using Bluetooth with various other electronic apparatuses, and therefore, provides conveniences for user so that user doesn't have to adjust the operating frequency every time the electronic apparatus crosses a border although different countries have different usable frequency bands.

Therefore, at the time of the invention, it would have been obvious to one of ordinary skill in the art to modify the system of De Beer by including the feature provided by Motomura.

### ***Conclusion***

**Examiner's Notes:** Examiner has cited particular columns and line numbers in the references applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner. In the case of amending the

claimed invention, Applicant is respectfully requested to indicate the portion(s) of the specification which dictate(s) the structure relied on for proper interpretation and also to verify and ascertain the metes and bounds of the claimed invention.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
